Summary

I am a highly skilled web developer with extensive experience in building dynamic and responsive web applications. My expertise encompasses a wide range of technologies, including React, HTML, CSS, JavaScript, and SQL databases. I am dedicated to delivering top-notch, production-ready code that meets and exceeds client expectations. During my tenure as an intern at CodeStack, I had the privilege of working on real-world projects, where I made significant contributions using cutting-edge tools and technologies.

Skills

- HTML
- CSS
- JavaScript
- TypeScript
- React
- SQL
- C#
- Angular
- Next.JS
- React Native
- Azure
- .NET
- Azure DevOps
- Bootstrap

Experience/Projects

CodeStack – Intern 2023 Jun – present

- 13 week internship working is a fast paced environment that includes bi-weekly sprints and retrospectives
- Working within systems such as Visual Studio and Visual Studio Code
- Produced code used on production level projects such as iHub and CAPTAIN

iHub – Project

- Used to help develop new partnerships and create new jobs within the San Joaquin county
- Developed and maintained software solutions in accordance with coding standards and best practices.
- Built using Next.JS, SQL database, and C# Endpoint API Integration
- Responsibilities included creating reusable table components and resolving design issues

CAPTAIN– Project

- Used by the state of California
- Built and designed using Angular, C# endpoints, and Microsoft SQL databases
- Fixed code bugs as well as design issues
